

About ePortfolio Templates

In creating an ePortfolio from our templates, you can decide on the following options:

1. Create from scratch
2. Major specific template
3. Introductory template
4. Advanced template

The ***Create from Scratch*** – Use this template if you want to create your own sections, pages, subpages and modules and write your own content without the help of guide questions or prompts.

The ***Discipline Specific template*** - Use this template if your instructor asks you to create an ePortfolio specific to your major. For example, if you are a Nursing major, choose the Nursing template. This template comes with built-in sections, pages, subpages and modules pre-defined by your respective department. If you want to add pages, subpages or modules, you can do so if you wish as well as delete existing pages, subpages or modules.

The ***Introductory template*** - Use this template if you have less than 45 credits. It has built-in sections, pages, subpages and modules. It also comes with editable prompts or guide questions that are designed to help you develop the content of your ePortfolio. If you want to add pages, subpages or modules, you can do so if you wish as well as delete existing pages, subpages or modules.

The ***Advanced template*** - Use this template if you have 45 credits or more. It has built-in sections, pages, subpages and modules specifically designed so you can continue developing your ePortfolio. It also comes with editable prompts or guide questions that are designed to help you add more content and material to your ePortfolio. If you want to add pages, subpages or modules, you can do so if you wish as well as delete existing pages, subpages or modules

*******NOTE: Once you choose a Template for your ePortfolio, you can modify it and change all the settings as you wish, but you cannot select a new template for your current ePortfolio. If you wanted to use a different template, you would have to create a new ePortfolio. *******
